

## Robo Critter Workshop Floor Plan

Space for instructors to help participants.

1. Participants & adult helpers are seated alternately so that each child has an adult helper.
2. The space in the center is so that instructors can help each pair as needed.
3. Pairs of tables can be placed end to end or side by side as the room accommodates.
4. We need electrical outlets nearby to run power cords & extensions along the tabletops.
5. We also need 2 tables set up near an electrical outlet for soldering stations.

We provide: all tools needed, hot melt glue, & solder.

You provide: tables, chairs, garbage receptacles  
a source of water  
robot parts (you order them & we will bring them with us)  
batteries for the robots (2 AA or 2 C cell)  
refreshments for participants (optional)
